

BLDEAs SSM College of Pharmacy & Research Centre Vijayapur-586103

(Affiliated to RGUHS, Karnataka, Approved by PCI & AICTE, New Delhi)

2.3.1

The institute ensures that teaching pedagogy is student-centric. College follows various measures for teaching and learning process to make it student-centric.

Participative learning

Participative learning encourages students to restructure their own knowledge and understanding of concepts, helps students recognize gaps in their understanding, promote effective problem-solving strategies, and teaches students to synthesize, communicate, and discuss ideas in ways that advance conceptual understanding. The institute makes use of participative learning methods like

- Group discussion
- Participative games
- Skits and plays
- Describing visual images
- Field visit
- Excursions
- Classroom debates

Experimental Learning

The experiential learning involves engaging students in activities that enable them to experience course content. Although experiential activities can take place in the classroom, there is an expressed emphasis on assigning projects that occur outside the classroom, where concepts can be better integrated into students' lives. The institute utilizes approaches like

- Conduct interviews or experiments
- Role play or simulations
- Keep a reflective journal

- Internship/Apprenticeship
- Student teaching
- Design and development of course relevant information

Problem solving methodologies

The problem-solving methodologies learning focuses on providing students with opportunities to identify and tackle complex, multifaceted problems in both small groups and on their own. In this approach, teachers serve as “tutors” or “facilitators” who guide learning by maximizing students’ responsibility for learning. The institute utilizes approaches with case studies for each relevant course curriculum for problem identification and facilitates learning through the generation of ideas in solving issues. The case study prepared covers the objective of detecting, identifying, assessing the problems and ways to explore the possible solution by the analytical, intellectual and investigative approach to the student which will be thoroughly facilitated by the tutor.

Process of Problem based learning

Stages	Stepwise procedure	Focused component
Stage 1	Group setting	Organization of groups
Stage 2	Problem identification	Facts, ideas, learning issues and action plans
Stage 3	Idea generation	
Stage 4	Learning issues	
Stage 5	Self-directed learning	
Stage 6	Synthesis and application	Working on action plans
Stage 7	Reflection and feedback	Result analysis
